## Objective

Seeking a challenging position as a Fullstack Developer where I can utilize my skills and experiences to contribute to the success of the company while continuing to grow professionally.

## Employment History

### Full Stack Developer, FinXP Ltd., Malta Europe

August 2022 — Present

- Develop fintech and portal admin web applications, encompassing both front-end and back-end development.
- Add features to existing applications based on the requirements from business analyst.
- Fix bugs and write dynamic codes to avoid possible issues.
- Manage database administration.
- Document application and code processes to easily track problems and implement new features.
- Adhere to development requirements such as writing unit tests, ensuring successful CI/CD integration, and producing reusable and well-organized code for future use.

### Part time Full Stack Developer, Unexus Inc., Manila

September 2023 — January 2024

- Develop a new application from scratch using React and Laravel.
- Resolve any bugs that arise in existing applications.
- Collaborate with QA and UI/UX designers to enhance user-friendliness of applications.

### Transcriptionist, TaskUs, Batangas

February 2021 — January 2022

Accurately transcribe alumni interviews for publication on university websites.

### Survey Interviewer, Dynata, Cebu City

July 2020 — November 2020

Contact list of respondents for a phone survey to gather statistical records related to consumer preferences of company products.
